## SUMMARY

Postdoctoral Fellow at The University of Texas at Austin with a Ph.D. in Electrical Engineering and expertise in thin-film deposition (PVD/CVD), crystal growth, materials characterization, and process optimization. Experienced in DOE-based process development, hardware troubleshooting, and large-scale data analysis using Python and MATLAB. Led multi-institutional experiments at Oak Ridge National Laboratory and published 6 first-author and 3 co-authored peer-reviewed journal articles. Strong foundation in semiconductor device physics and CMOS process flows through graduate-level coursework.

## EDUCATION

- Led complex characterization experiments on solid electrolytes using TAX (HFIR) and ARCS (SNS) instruments, coordinating with beamline scientists to optimize experimental parameters.
- Developed automated data processing and analysis workflows in Mantid and Python, reducing analysis turnaround and improving reproducibility.
- Generated technical documentation and coordinated across 5+ institutions including ORNL, ETH Zürich, and TU Wien.

#### Graduate Researcher — Battery Materials & Process Engineering

Columbia University

Sep. 2019 - Jan. 2021

New York, NY

- Developed composite separator fabrication processes using solution processing of  $\gamma$ -C<sub>3</sub>N<sub>4</sub>/PVDF, optimizing film uniformity and mechanical properties.
- Assembled prototype coin cells and performed electrochemical characterization (EIS, galvanostatic cycling) to evaluate process quality and device performance.
- Conducted first-principles simulations (Quantum ESPRESSO) to predict defect behavior and guide process design for olivine-type electrode materials.

#### Student Researcher — Hardware Design & Characterization

Beijing Normal University

Sep. 2018 - May 2019

Beijing, CN

- Designed precision uniaxial-strain devices in SolidWorks for thin-film sample characterization.
- Performed systematic transport measurements using PPMS, developing testing protocols for temperature-dependent material studies.

### PROFESSIONAL MEMBERSHIPS

---

- Sigma Xi, The Scientific Research Honor Society — Elected Full Member (2026)
- American Physical Society (APS) — Member (2025 – 2026)
- Materials Research Society (MRS) — Student Member (through 2027)
- The Society for Collegiate Leadership & Achievement (SCLA) — Member (2026)
